

MAHALAKSHMI KUMAR

FRONTEND DEVELOPER

Polur, Tiruvannamalai, Tamil Nadu +91-9715782918 mahalakshmikumar064@gmail.com

Results-oriented Frontend Developer with 1.9 years of experience in building responsive and scalable web applications using React.js, TypeScript, and modern JavaScript frameworks. Experienced in developing healthcare workflow platforms, AI-assisted medical documentation systems, and enterprise web applications. Skilled in component-based architecture, REST API integration, responsive UI development, and offline-first data synchronization solutions.

EXPERTISE AREAS

- React.js Application Development
- TypeScript & Modern JavaScript (ES6+)
- REST API Integration
- Responsive Web Design
- Component-Based Architecture
- UI Development using Tailwind CSS & Material UI
- State Management (Basic Redux)
- Offline Data Synchronization (PowerSync)

EDUCATION

- Master of Computer Science (M.Sc Computer Science)
Alagappa University - 2024 - Pursuing
- Bachelor of Computer Science (B.Sc Computer Science)
Thiruvalluvar University -m2019 - 2020 | 72%
- Higher Secondary Education (HSC - 12th Grade) | 81%
Cluny Matriculation Higher Secondary School - 2018 - 2019
- Secondary School (SSLC - 10th Grade) | 63%
SRGDS Matriculation Higher Secondary School - 2016 - 2017

PROFESSIONAL EXPERIENCE

Frontend Developer - Plenome Technologies Pvt Ltd 2024 - Present

- Developed scalable frontend applications using React.js and TypeScript.
- Designed reusable UI components improving application performance and maintainability.
- Integrated REST APIs for dynamic data retrieval and system interactions.
- Built responsive interfaces using Tailwind CSS and Material UI.
- Collaborated with UI/UX designers to translate Figma designs into production-ready components.
- Used Git, GitHub, GitLab, and Jira for version control and agile project management.

PROJECT EXPERIENCE

Ashwini AI - Healthcare Workflow Platform

Developed a healthcare application that automates patient workflows and clinical documentation.

- Built appointment booking system and patient intake forms.
- Integrated voice-to-text doctor consultation recording.
- Implemented automatic SOAP Notes generation.
- Developed Patient Summary Dashboard for quick clinical insights.

Technologies: React.js, TypeScript, Tailwind CSS, REST APIs

IIT Madras Election Management System

Developed a digital platform used to conduct elections across different departments.

- Built election system for hostel, food, and administrative departments.
- Implemented candidate nomination and voting interface.
- Developed secure voting system ensuring one vote per user.
- Built real-time vote counting and result dashboard.

Technologies: React.js, JavaScript, REST APIs

OTMS – Organ Transplantation Management System

Developed a healthcare platform designed to manage organ transplantation workflows, donor-recipient matching, and waiting list management for hospitals and transplant authorities.

Key Contributions

- Developed dynamic waiting list management system for organ allocation.
- Built complex data tables using AG Grid to display transplant-related patient data.
- Implemented CSV export functionality including custom cell renderer data.
- Developed responsive UI layouts for mobile and tablet devices using Tailwind CSS and MUI Grid.
- Implemented multi-filter search functionality for hospital type, organ type, and status.
- Designed reusable React components to improve maintainability and scalability.

Impact

- Improved efficiency of organ allocation and transplant coordination workflows.
- Enabled hospitals to manage transplant waiting lists and patient records more effectively.

Technologies

React.js, TypeScript, AG Grid, Tailwind CSS, Material UI, REST APIs

Apollo Hospital Offline Data Sync System

Developed an offline-first healthcare data management system to ensure uninterrupted hospital operations in environments with unstable internet connectivity.

Responsibilities & Contributions

- Implemented offline data storage using PowerSync, allowing hospital data to be stored locally when internet connectivity is unavailable.
- Built automatic synchronization mechanisms to push locally stored data to the central database once connectivity is restored.
- Ensured data consistency and conflict resolution between local and remote databases.
- Developed frontend interfaces for managing patient data and synchronization status.
- Collaborated with backend teams to integrate secure and reliable data synchronization workflows.

Technologies

React.js, TypeScript, PowerSync, REST APIs

ADDITIONAL INFORMATION

Languages:

English, Tamil, Telugu

Tools:

Git, GitHub, GitLab, Jira, Figma, VS Code

Core Skills:

React.js, TypeScript, JavaScript, Tailwind CSS, Material UI, REST APIs, PowerSync
